## **Project Title: Takashi Murakami**

I want to make a microsite for the Japanese artist, Takashi Murakami. His work is vibrant and crazy at times, which I think would be a fun topic to write and design about it. There is a wide variety of work that could be featured on the page (sculptures, screen-prints, paintings, etc.) and a distinct visual language to play with. I want to make a multi-page site with a navbar at the top organized by the topics outlined below:

**General Bio/Introduction/Home page**– this page will include brief details about Murakami and outline the most notable things he has done in his career. It'll also act as the home page to navigate between early life, career, collabs, and sources.

**Early life -**

**Career -**

**Collaborations-**

**Sources** – this page will just list sources, including the Wikipedia page, as well as other sources for photography, and any other credits that need to be provided.
